

My Trip to the Southeast

This is a map of the Southeast Region

Everglades

Today I went to the Everglades! I saw a lot of unique animals like Bottlenose dolphins and key deer! You might be wondering what is the Everglades? The Everglades is A swap/wetland. And it is hot/ warm. Sadly people are **destroying** it. Some people **drove off roads** which killed **vegetation**. But other than that It was a great time!

Kennedy space center

Today I went to the Kennedy space center. I saw a lot of cool sites. Such as the Atlantis ship. I even got to see **real Astronauts!** And I even got to have lunch with them. Also the Kennedy space center Started in 1961. Over 17million people come per year. You might even see a rocket launch! It feels like the ground is going to explode!

Jamestown, Virginia

Today I went to Jamestown It was really Interesting. They had a hard life. Because They had no water and no food. You might be wondering what is Jamestown? Jamestown is the very first English settlement. But you would not want to live there during 1607 because there were some bad things. But it was a great time!

A coal Mine in Appalachia

Today I went to the Appalachian mountain it is located in the southern part in the Appalachia. There is a lot of Minerals. They also use a lot of coal. Coal is used to heat homes and produce electricity. There are also strip mines they are really cool! It was a great time!

Tennessee

Today I went to the adventures of 

Tennessee . I went to largest underground lake called the “Lost sea” it was a really cool time! Then I went to Memphis Tennessee Sadly it was where Martin Luthier King Jr was killed. Fun fact! Did you know that Memphis is a location on the Mississippi river. After that I went to see some of the really cool wildlife animals . Like the deer, rabbits , and so much more. Fun fact! Did you know that wild hogs live in mountains. Also, the state forest is filled with trees. That was what I saw in Tennessee for today.

:) :D

Cotton Plantation in Natchez, Mississippi

Today I visited a cotton Plantation in Natchez, Mississippi. It was very sad because a bunch of slaves had to work there and pick cotton. The Plantation was a large farm also the white people would make money from the cotton even though they were not doing any work. And the black people/slaves were doing all of work. The white people started getting wealthy from that in the 1800s. But then in the 1800s the civil war started sadly 600,00 people were killed in the civil war. There were some interesting facts about the cotton Plantation.

Civil Rights memorial Montgomery, Alabama.

Today I went to Montgomery, Alabama Civil Rights Memorial. White and black people had to go to different schools and they had different houses. And they had to go to different neighborhoods for example the white people had nice houses in a nice neighborhood and the black people had old houses and not a nice neighborhood. Also the black people had to give up their bus seats. For the white people for example when the black people are sitting on the bus and the white people are standing and the black people are sitting the black people had to get out of their seat and give to the white people that is what I learned at the Civil Rights Memorial.

Natural Resources of the Southeast Region

Cotton

suger.

coal

tabco

Peaches .

corn.

rice.

Wood
